Store, search and share medical records with doctors and attorneys

The Challenge When a person is involved in an accident they must obtain medical records from multiple providers and deliver them to numerous attorneys and insurance companies. This process, which seems straightforward, is actually very time consuming, tedious, and confusing for patients.

Obtaining records often requires several trips to various hospitals and doctors' offices, where numerous forms must be filled out and submitted. Assuming the requests make it where they need to go, patients must wait for the records to be delivered and then copy and deliver the records to all parties involved. These records often never arrive, requiring the patient to repeat the process.

The Solution YuuviBear streamlines the process of acquiring and sharing medical files, allowing patients to gather and distribute the required documents from the comfort of their home. By accessing the YuuviBear website, patients can search for record release forms from each hospital or provider. Once the records have been received, patients can upload them to the YuuviBear website where they can be shared with attorneys, insurance companies, and other medical professionals. Using yuuvvis® Ultimate, YuuviBear not only uploads, stores, and retrieves medical files, but allows patients to run a search query for files that contain specific metadata, so they can share the correct information with the right recipient.

Furthermore, doctors and attorneys can use YuuviBear to request files from patients. Once granted access by the patient, the requesting professional can view and download the necessary documents.

Benefits:

- Download medical record requests from multiple hospitals and doctors' offices at the click of a button
- Upload medical files to be shared with the attorneys, doctors, and insurance companies of your choice
- Search for specific files by content
- Allow doctors, insurance companies, and attorneys to request the files they need
- Be certain that important records are received in a timely manner
